BENEFITS

HYBRID SYSTEM

Clean and convenient installation without forging or laying wires. The NVE-EPV101KPWIFI panel and monitors support Wi-Fi technology, so they can work in a wireless network.

CAMERAS PREVIEW

Integration with the VSS system allows to display up to 8 video streams which can be viewed through the Tuya Smart or Smart Life APP.

DVR FUNCTION

Once detected, the monitors or panel* will record video for 1 minute followed by one minute pause. After another detection occurs, the system will record video for 1 minute. Only the first 4 streams added to the monitor can be recorded. Streams 5-8 can only be previewed.

REGISTRATION OF GUESTS

Each attempt to connect with the household members can be saved in the device memory as a photo or a minute video recording with sound.

VOICEMAIL

Voice messages can be saved in the SD card memory. If the call is not answered, the message is recorded (when this function is turned on).

RTSP STREAMING

RTSP streaming allows to add an RTSP stream from the panel to both Novus recorders and Novus Management System software.

INTERCOM

Possibility to connect to any monitor in the same apartment. Possibility to connect with other monitors in the same network and support for SIP / VoiP connections**.

DOOR/GATE CONTROL

The entrance panels have 2 independent relays from the door and the gate, while an additional bell can be connected to the subscriber's monitor.

MOBILE APP

The Tuya Smart or Smart Life APP allows to control the relays of the entrance panels and receive alarm notifications on your smartphone. The applications also allows you to view all streams added to monitors.

*NVE-EPV101KPWIFI ; **User monitor

MORE FUNCTIONALITIES

Motion and / or human detection* (alarm notifications)

Possibility to send a voice message on all monitors in a given apartment

Unlock with password**

Possibility to listen to sounds from the surroundings of the selected monitor

Record photos and videos during a call

Night mode: Possibility to set the hours when the monitor will have a different volume

5 alarm clocks

Wide (120°) viewing angle

Memory for up to 100 proximity cards

Support microSD card from 8 to 512 GB

Dynamic and static IP addressation

Digital frame or digital clock function

Personalization: the possibility to upload your ringtone and wallpaper

Powered by PoE*** /15 VDC

IP66

The entrance panels have IP66 weather resistance

*Human detection function available in dedicated panels; **NVE-EPV101KPWIFI and NVE-EPV120KP; ***NVE-EPV101KPWIFI is powered by passive 24V PoE
